presidentsdesk@f-a-f.org

Dear Financial Accounting Foundation:

With out delay, it is essential that the FAF accept and implement the recommendations made by the Blue Ribbon Panel on Private Company Financial Reporting regarding differential standards and a separate standard-setting entity for private companies. Such historic change is necessary to effectively bring about sensible, meaningful financial statements for private companies and the users of their financial statements (such as bankers/lenders, insurers, venture capitalists, bonding agents bonding underwriters,and others).

I believe a systemic problem exists. There is an increasing lack of relevance of accounting standards for private companies and their financial statement users. Further, the panel was correct in that It does not make sense to incur significant cost to comply with standards that have become ever more irrelevant in the private company world.

In addition, substantive differences in current and future standards for private companies, where appropriate, are necessary.Having appropriate differences will lead to more relevant financial statements that provide decision-useful information to the users of private company financial statements

Further, a new, separate body with standard-setting authority must be established directly under FAF and not subject to FASB approval.History and the current environment clearly show that FASB cannot effectively balance the competing needs of both the public company and private company areas .

The panel's report is based on a year of discussion, research efforts spanning 30 years and input from private companies and their financial statement users, among others. Differential standards and an autonomous standard-setting body to implement them for private companies are needed now.

Thank you.

Sincerely,

Stanley J Sterk CPA
