Dear Financial Accounting Foundation:

This letter is to express my support for the recommendations made by the Blue Ribbon Panel on Private Company Financial Reporting regarding differential standards and a separate standard-setting entity for private companies. Such historic change is necessary to effectively bring about sensible, useful financial reports for private companies and the users of their financial statements (such as bankers/lenders, insurers, venture capitalists and others).

I believe a systemic problem exists. Accounting standards have been and are driven by issues affecting public companies. Further, the panel was correct in that it does not make sense to incur significant cost to comply with standards that have become ever more irrelevant in the private company world.

In addition, substantive differences in current and future standards for private companies, where appropriate, are necessary. The problem is fundamental, and not just about disclosures and relief on effective dates for new standards.

Further, a new, separate body with standard-setting authority must be established directly under FAF and not subject to FASB approval. History and the current environment clearly show that FASB cannot effectively balance the competing needs of both the public company and private company areas.

The panel's report is based on a year of discussion, research efforts spanning 30 years and input from private companies and their financial statement users, among others. Differential standards and an autonomous standard-setting body to implement them for private companies are needed now.

Thank you.

Sincerely,

Michael F Drennen
