Norwalk, CT 06856-5116
presidentsdesk@f-a-f.org

Dear Financial Accounting Foundation:

At this time I wish to express my support for the recommendations made by the Blue Ribbon Panel on Private Company Financial Reporting regarding differential standards and a separate standard-setting entity for private companies. Such historic change is necessary to effectively bring about sensible, useful financial statements for private companies and the users of their financial statements (such as bankers/lenders, insurers, venture capitalists and others).

I believe a systemic problem exists. There is an increasing lack of relevance of accounting standards for private companies and their financial statement users. Further, the panel was correct in that private companies are incurring significant unnecessary costs for GAAP financial statement preparation and audit, review or compilation services.

In addition, substantive differences in current and future standards for private companies, where appropriate, are necessary. Private company financial reporting, as it stands now, is too complex, embodies too much irrelevant information and is too costly and time-consuming given its benefits.

Further, a new, separate body with standard-setting authority must be established directly under FAF and not subject to FASB approval. FASB cannot be expected to effectively address both the needs of public and private companies.

The work done by the panel was extensive and took into account input from all the key constituencies of private company financial reporting. Differential standards and an autonomous standard-setting body to implement them for private companies are needed now.

Thank you.

Sincerely,

Kevin Haut
