Dear Financial Accounting Foundation:

I support the recommendations made by the Blue Ribbon Panel on Private Company Financial Reporting regarding differential standards and a separate standard-setting entity for private companies. Such historic change is necessary to effectively bring about meaningful yet cost effective financial statements for private companies and the users of their financial statements (such as bankers/lenders, insurers, venture capitalists and others).

I believe a systemic problem exists. The current standard-setting process does not adequately take into account the needs of the private company sector. There is an increasing lack of relevance of accounting standards for private companies and their financial statement users. Further, the panel was correct in that private companies are incurring significant unnecessary costs for GAAP financial statement preparation and audit, review or compilation services.

Further, a new, separate body with standard-setting authority must be established directly under FAF and not subject to FASB approval. Without such a body, the differences needed in the standards are unlikely to occur, just like with past committees and efforts.

Users and preparers of financial statements as well as others provided valuable and adequate research to the panel on the problems and needed solutions related to private company financial reporting. Differential standards and an autonomous standard-setting body to implement them for private companies are needed now.

Thank you.

Jeffrey A. Elwell, CPA
