Dear Financial Accounting Foundation:

This letter is to express my support for the recommendations made by the Blue Ribbon Panel on Private Company Financial Reporting regarding differential standards and a separate standard-setting entity for private companies. Such historic change is necessary to effectively bring about sensible, useful financial reports for private companies and the users of their financial statements (such as bankers/lenders, insurers, venture capitalists and others).

I believe a systemic problem exists. There is an increasing lack of relevance of accounting standards for private companies and their financial statement users. Further, the panel was correct in that it does not make sense to incur significant cost to comply with standards that have become ever more irrelevant in the private company world.

In addition, substantive differences in current and future standards for private companies, where appropriate, are necessary. Private company financial reporting, as it stands now, is too complex, embodies too much irrelevant information and is too costly and time-consuming given its benefits.

Further, a new, separate body with standard-setting authority must be established directly under FAF and not subject to FASB approval. This might be the most important recommendation to implement.

The work done by the panel was extensive and took into account input from all the key constituencies of private company financial reporting. Differential standards and an autonomous standard-setting body to implement them for private companies are needed now.

Thank you.

Sincerely,

A handwritten signature in black ink that reads "Patrick Deignan".
