RE: Private Company Financial Reporting

Dear Financial Accounting Foundation:

This letter is to express my support for the recommendations made by the Blue Ribbon Panel on Private Company Financial Reporting regarding differential standards and a separate standard-setting entity for private companies. Such historic change is necessary to effectively bring about appropriate financial reporting for private companies and the users of their financial statements (such as bankers/lenders, insurers, venture capitalists and others).

I believe a systemic problem exists. The current standard-setting process does not adequately take into account the needs of the private company sector. Further, the panel was correct in that there is not a proper weighing of costs and benefits when it comes to setting standards for private companies.

In addition, substantive differences in current and future standards for private companies, where appropriate, are necessary. Private company financial reporting, as it stands now, is too complex, embodies too much irrelevant information and is too costly and time-consuming given its benefits.

Further, a new, separate body with standard-setting authority must be established directly under FAF and not subject to FASB approval. Given the public company reporting pressures placed upon FASB, the board cannot adequately respond to the competing needs of the private company sector.

The panel's report is based on a year of discussion, research efforts spanning 30 years and input from private companies and their financial statement users, among others. Differential standards and an autonomous standard-setting body to implement them for private companies are needed now.

Sincerely,

BERGAN, PAULSEN & COMPANY, P.C.
